EC2 deployment

https://ec2-deployment.amazon.com/

Networking

DEXTER

https://dexter-vpc-ia-pdx.pdx.proxy.amazon.com/ec2/network-monitor/vpc-ia/fleetwide/history/2022-09-08.html

Modify the date from URL to load the network connectivity status, especially for public connectivity fro ma particular region, like PDX.

Dexter/PDX - VPC-IA fleetwide Status (2022-11-05 GMT)

PDX / vpc-ia

This page was rendered at Sat Nov 5 07:03:10 2022, and represents the view from **ec2-dexter-pdx-vpcia-60001.pdx1.amazon.com** .
The displayed IPv6 address has been truncated to fit in the space provided. The initial common 56 bits have been left out.
Click on the instance id to go to Admiral, where the full address is displayed.

IA - INTERFACE ANALYZER

https://pdx.interface-analyzer.ec2.aws.a2z.com/

By providing the instance ID, you will get all the ENI attached to it, then retrieve the detailed metrics like pps, tcp connection, throughput.
Besides, we could also get droplet ip and other underly info in IA.

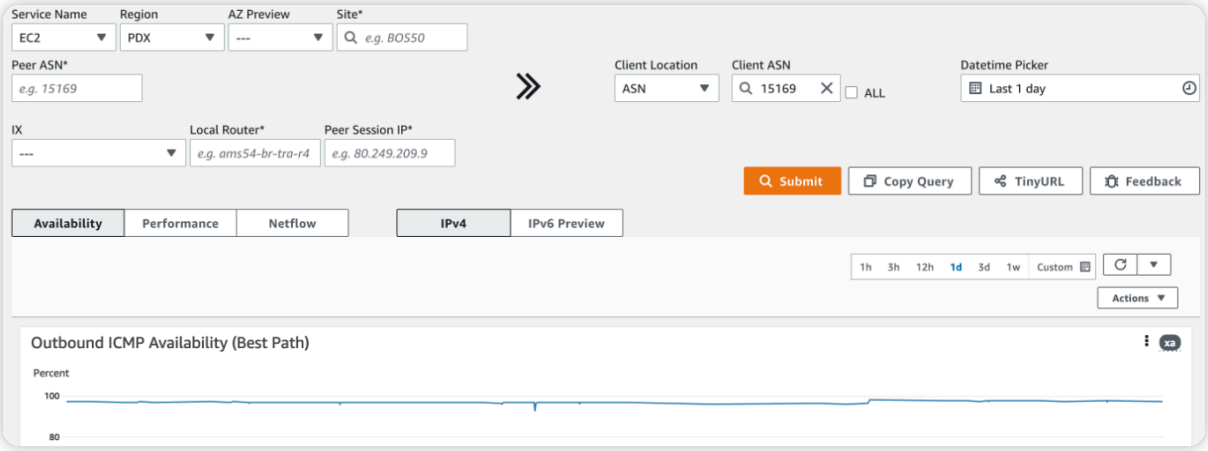
DIRECT CONNECT EVENTS

https://tiny.amazon.com/1f5jfhw5w
Can be used for checking other services as well.

ARGOS

https://prod.argos.networking.aws.dev/select/availability/ipv4?serviceName=EC2®ion=PDX&clientLocation=ASN&clientASN=15169&startTime=-P1D&endTime=P0D

Provide Peer BGP ASN to check the packet drop metrics from an AWS region



IP RANGES

https://ip-ranges.amazonaws.com/ip-ranges.json

Check AWS service IP ranges

CW-DASHBOARD - INTER AZ/REGION

https://cw-dashboards.aka.amazon.com/cloudwatch/dashboardInternal?accountId=295918709765&name=ap-northeast-1#dashboards:name=us-west-2

Select the desired region, you will get a quick view of the packet loss, latency metrics of Inter-Region and Inter-AZ.

CVIEW - BACKBONE PHYSICAL DEVICE/LINK STATUS

https://cview.aka.corp.amazon.com/

The source and destination are the IP addresses of the Droplets of source and target, usually put ‘EC2’ as the value of Fabric

CONAN

https://w.amazon.com/bin/view/AmazonWebServices/SalesSupport/DeveloperSupport/Internal/SupportOperations/Network_Infrastructure/CONAN/

Troubleshoot the network issues across AWS Backbone (Inter-region), S3, EC2 Inter/Intra-AZ network,
This dashboard provides you the latency, packet loss and connectivity metrics for the each region.
Select the desired region from menu.

https://elb-atlas-iad.amazon.com/load_balancers/search?utf8=%E2%9C%93&search_term=793684541905&state=ACTIVE&load_balancer_type=NLB&commit=Search

TGW

https://monitorportal.amazon.com/igraph?SchemaName1=Search&Pattern1=servicename%3D%24FabricL3Tops_topgroup_zonecell%24%20dataset%3D%24Prod%24%20methodname%3D%24health_table_stats%24%20metricclass%3D%24NONE%24%20schemaname%3DService%20%28Zoetop%29%20cell4%20metric%3D%24percent_top_health_pings_lost%24%20marketplace%3Dpdx&Period1=FiveMinute&Stat1=p100&HeightInPixels=566&WidthInPixels=1398&GraphTitle=T2T%20Health%20Ping%20Loss%20Percentage%20-%20P100&DecoratePoints=true&TZ=Asia%2FShanghai@TZ%3A%20Shanghai&ShowLegendErrors=false&ShowGaps=false&HorizontalLineLeft1=%201&LabelLeft=Percentage&StartTime1=-PT3H&EndTime1=-PT0H&FunctionExpression1=S1&FunctionLabel1=%7BmetricLabel%7D

https://w.amazon.com/bin/view/Runbook_for_Zoetop_Support/#HTGW4E1F5305554F984C86557406

https://cw-dashboards.aka.amazon.com/cloudwatch/dashboardInternal?accountId=451579006310#dashboards/dashboard/SHEIN-TgwCwDashboard-us-west-2

PIMMS

https://pimms.amazon.com/v2/?region=EC2-PDX

Detailed underlying physical devices/links metrics, work with CONAN together would be more helpful.

Example---EBS Jitter due to unstable network, “pimms—agent—input ebs primary server ip and time span”

REDIS LU

https://ramrod.corp.amazon.com/

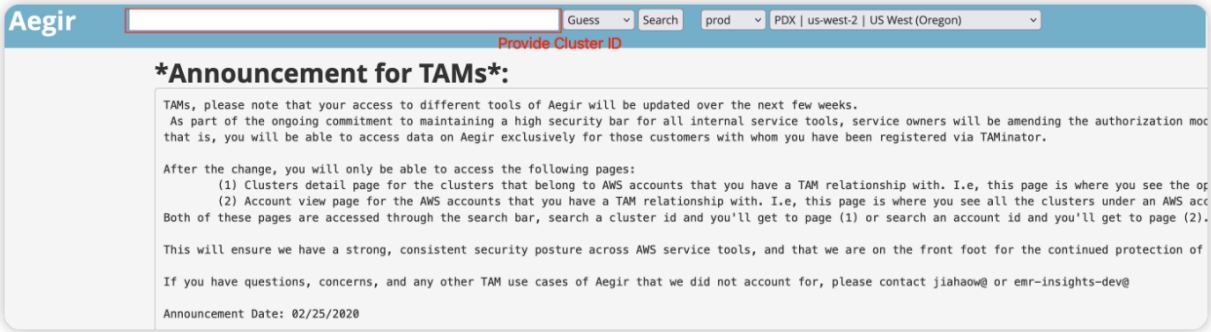
Filtering with region ID, you will get the scheduled LU activities for post and upcoming few weeks.

https://ec2-deployment.amazon.com/host
EC2 deployment event

EMR OPERATION CONSOLE (PDX)

https://aegir-us-west-2.amazon.com/Default?&domain=prod&realm=us-west-2

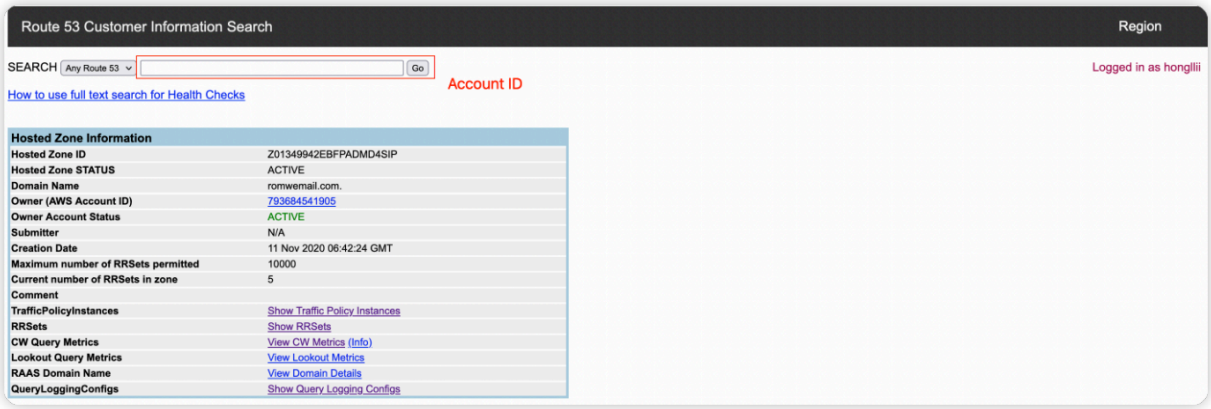
Select the desired region from top right dropdown list, then searching with EMR Cluster ID.
It will show you configurations, event logs, status and other stuff.



ROUTE53 CUSTOMER INFORMATION

https://route53-information-search.amazon.com/customersearch?searchFieldType=HostedZoneID&searchFieldValue=Z01349942EBFPADMD4SIP

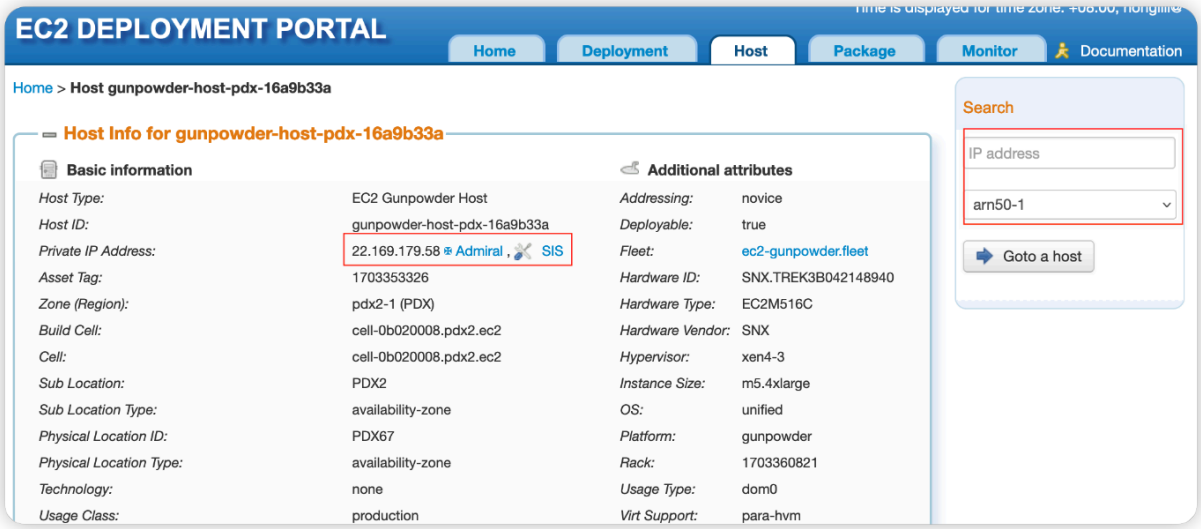
Check customer route53 configurations.



DROPLET MAINTENANCE INFO

https://ec2-deployment.amazon.com/host

Get Droplet IP from IA



S3

S3 NODE FINDER

https://s3-us-west-2-finder.amazon.com/snmFinder/snmFinder?context=PROD&key=dsdata01&encoding=NONE&style=HTML&refresh=0&kmi=&noGetNearest=noGetNearest&findSNM=Find+SNM%27s&noFederationRedirect

Get S3 Bucket detailed configuration information

访问S3权限报错DETAIL信息：
